### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance: The primary reason for allowance of claims 1,2, 15-39 is the inclusion of a method steps of a for depositing field droplets that includes establishing flow of air substantially collinear with a trajectory of fluid droplets emitted by each of one or more droplet emitters the flow of air having a velocity profile characterized by a maximum airflow velocity. It is these steps found in the claim, as they are claimed in the combination of that has not been found, taught or suggested by the prior art of record, which makes these claims allowable over the prior art.

The primary reason for allowance of claim 3 is the inclusion of a method steps of a for depositing field droplets that includes emitting the fluid droplets from a plurality of nozzles into a region of the flow of air, the region having a regional airflow velocity lower than a maximum airflow velocity of the flow of air. It is these steps found in the claim, as they are claimed in the combination of that has not been found, taught or suggested by the prior art of record, which makes these claims allowable over the prior art.

The primary reason for allowance of claims 9, 10, 40-61 is the inclusion of the limitations of an apparatus for depositing fluid droplets that includes an airflow velocity profile with a maximum airflow velocity, and at least one nozzle disposed to emit fluid droplets at a fluid droplet velocity into the first region. It is these limitations found in the claims, as they are claimed in the combination of that has not been found, taught or suggested by the prior art of record, which makes these claims allowable over the prior art.
